

INVITATION

Dear Attendees,

We are glad to announce the "**Minia International Conference on Environment and Engineering (MICEE 2024)**" to be held in **Hurghada, Egypt on October 09-12, 2024** organized in collaboration with generous support and cooperation from academia, industry institutes, editorial board members under the auspices of Faculty of Engineering, Minia University.

MICEE 2024 aims to share new ideas and technologies among professionals, industria lists, and students involved in environmental, energy, and engineering research. The main objective is to provide a platform for the presentation of new work in one meeting focused solely on the environment, energy, and engineering. We will organize more focused sessions that will feature cutting-edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

MICEE 2024 consolidates invite Keynote Presentations, Oral Talks, Poster Presentations, Sponsors and Exhibitions.

Host Organization: Faculty of Engineering in Minia University was established in 1976, Minia University is a non-profit public higher education institution located in the urban setting of the medium city of Minya. Officially recognized by the Ministry of Higher Education of Egypt, Minia University is scaled as a very large Egyptian higher education institution.

CONFERENCE THEME

MICEE 2024 Committee is honored to welcome you all to attend **Minia International Conference on Environment and Engineering (MICEE 2024)**, which will be held during **October 09-12, 2024**, at Hurghada, Egypt. **MICEE 2024** will raise the most dynamic and latest issues in the field of Environment, Energy, and Engineering. The Congress will highlight the discussion around "Exploring the engineering solutions to preserve the environment" by bridging the gaps between the intellectuals across the globe to enlighten their research and findings at MICEE 2024.

Objectives

After participating in this meeting attendees should be able to:

- Discuss current and emerging issues in environment, energy, and engineering.
- Highlight critical research gaps in the environment, energy, and engineering research.
- Discuss and apply recent research findings related to the environment, energy, and engineering.
